

5-DAY ADVANCED COURSE

DENTAL

ONLINE

DAY 1

Advanced Osteoimmunology Exploring Inflammation and Immune Responses

- Advanced Osteoimmunology and Inflammation
Deep Dive: Infectious and Aseptic Inflammations
- Key Markers: Tissue CCL5, Serum CCL5, Th1-Th2-Th17, Titanium Stimulation Testing
 - Interactive Session: Participant Case Presentations Based on Basic Course Knowledge

Therapies and Technologies Overview

- In-Depth Discussion: Technologies, Supplements, and IV-Therapy Strategies
- PRF Theory: Exploring Various Approaches and Clinical Applications
- Interactive Session: Open Discussion and Case

DAY 3

Functional and Structural Dentistry

- Deep Dive: Trigemino-Cervical Trunk and Its Role in Dental Functionality
- Case-Based Discussion: Participant Presentations Using Basic Course Knowledge
- Interactive Session: Open Discussion and Shared Insights

Parafunctions: Physiology and Psychology

- Understanding Parafunctions: Exploring Physiological and Psychological Dimensions
- Interactive Session: Open Discussion and Case Analysis

DAY 2

Comprehensive Biomaterials in Dentistry

- Collaborative Insights: Understanding Biomaterials and Working with Dental Technicians
- Material Types: Bioinert, Bioactive (Regenerative Dentistry), and Alloys/Metals

Transitioning to Metal-Free Dentistry

- Challenges and Solutions: Navigating the Shift to Metal-Free Practices
- Case-Based Discussion: Participant Presentations and Practical Insights
- Interactive Session: Open Discussion and Knowledge Exchange

LIVE

DAY 1

Comprehensive Treatment Planning in Practice

- Live Case Studies: Developing Comprehensive Treatment Plans with Real Patients
- Patient Communication: First Visit Best Practices in the Dental Office
- Financial Planning: Live Presentation of Treatment and Cost Strategies

Case Presentation and Diagnostics

- Participant Insights: Approaches to Anamnesis, Diagnostics, and Case Presentation
- Interactive Discussion: Sharing Strategies and Experiences

DAY 2

Detox Strategies and Case-Specific Therapies

- Case-Specific Approaches: Lab Work, Infusions, and Non-Invasive Therapies with Decision-Making Algorithms
- Dark Field Application: Integrating Advanced Diagnostic Techniques
- Core Principles: Detox and Rebuilding Strategies in Dental Therapies
- Interactive Discussion: Collaborative Insights and Q&A

Live Therapy Demonstrations

- Hands-On Presentation: Paired Participants Present Therapies Using Diagnostic Data
- Interactive Discussion: Insights, Feedback, and Q&A
